

DETOXIFY. EXFOLIATE. INFUSE.

The JetPeel process is simple, and chemical-free. It uses Jet Solutions in combination with pressurized air, along with a proprietary hand-piece that breaks the solution into micro-sized droplets. The result is a comfortable and soothing facial exfoliation, that improves the skins texture and hydration levels.

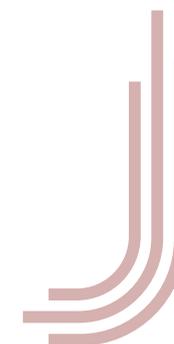

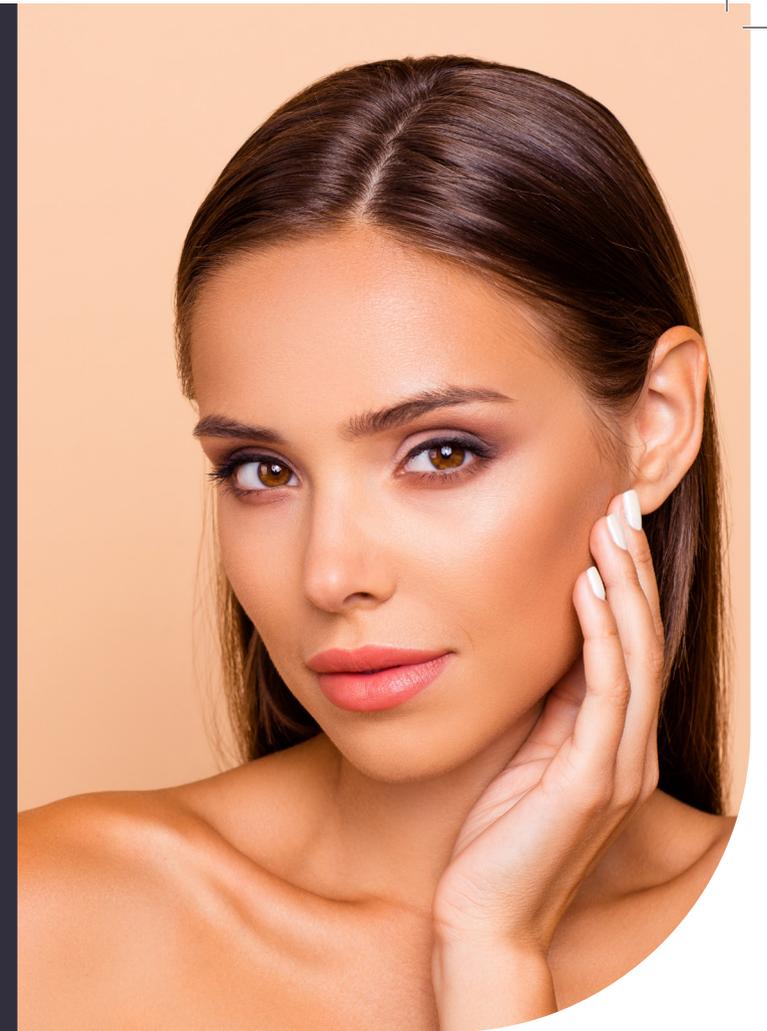

“This treatment leaves skin tightened and glowing. It can even be done the morning of your wedding since a JetPeel facial produces zero redness or irritation.”

- BRIDES

JetPeel is the newest innovation in non-invasive skincare, offering a needle-free, pain-free solution for serious skincare. Patented technology using pressurized oxygen, accelerates a jet stream of liquid micro-droplets, creating tiny microchannels in the skin to deliver nutrients down to the dermal layer. Each JetPeel treatment includes lymphatic drainage, exfoliation, and a customized infusion of natural, bioactive skin nutrients to address specific skin conditions, providing visible results with no downtime or skin irritation.

JETPEEL

***Immediate Results. Instant Glow.
Plump Hydrated Skin.***

- Easy to use
- Safe for all skin types
- Improve skin texture
- Deep cleans and unclogs pores
 - Reduce fine lines
- Improve skin hydration
 - Remove dead skin
- Overall skin rejuvenation

WHAT IS JETPEEL?

The JetPeel system is an innovative, multi-purpose, transdermal infusion device that can also be used for the NO NEEDLE, PAIN-FREE application of Platelet Rich Plasma (PRP) anywhere on the body – even immediately post procedures. Traditionally, PRP treatments, especially scalp applications for hair restoration, are quite painful. With JetPeel you can experience a completely pain-free experience.

- No Pain
 - No Needles
 - No Downtime
- Just results.**

Q: HOW DOES A JETPEEL FACIAL WORK?

A: JetPeel is a technology that combines pressurized air with active ingredients to deliver solutions deep into the skin without needles or without injuring the epidermis. It is a one of a kind technology that can effectively treat and prevent various skin conditions and concerns without any downtime.

Q: HOW LONG DOES A TREATMENT TAKE?

A: Treatments range between 15-45 minutes. With no irritation or redness, you will be able to return to your daily activities immediately.

Q: HOW SOON CAN YOU SEE RESULTS?

A: Visible results can be seen after one treatment, with continued improvement over several sessions.
