INTRODUCING SYLFIRM X RF MICRONEEDLING

Sylfirm X is the **world's first and only** dual wave Radio Frequency (RF) Microneedling system licensed by Health Canada and cleared by the FDA. It **safely and effectively targets multiple conditions** on the skin and scalp for the ultimate treatment.

STIMULATE COLLAGEN AND ELASTIN PRODUCTION

- ✓ State-of-the-art RF energy is combined with microneedling to deliver energy into the skin at **customizable depths and levels.**
- ✓ Energy can be deployed in two modalities, **continuous wave** for **skin resurfacing, tightening and rejuvenation** or **pulse wave** to **target acne, pigmentation and vascular conditions.**
- ✓ Patented technology with gold-plated microneedles is designed to provide the most **efficient, versatile treatment(s) while protecting the top epidermis of the skin.**

FAQ

What does Sylfirm X treatment feel like?

Most people describe it as comfortable with little to no pain, only a slight tingling sensation with light pressure. Based on the depth and area treated this feeling can vary. Some practitioners may opt to use a numbing cream.

How many treatments do I need?

Most physicians find that 3 - 4 treatments, spaced 4 - 6 weeks apart provide the best experience and outcome.

How long does the treatment take?

It takes about 20 - 45 minutes depending on the treatment area.

How fast will I see results?

While results can be seen immediately for skin tone and texture, the process of collagen regeneration increases over time with optimal results seen at three months post your last treatment.

How long do the results last?

Everyone is different, but the collagen you make is your own and continues with accelerated production over three months, at which time your provider may recommend scheduling maintenance treatments.
